

**Authorized Use of School Property
School Board Approved: October 21, 2019**

School property may only be used for school-related, civic, or educational purposes.

The Board shall permit school property to be loaned to staff members when such use is related to their employment and to students when the property equipment is to be used in connection with their studies or extracurricular activities. Proper controls shall be established to assure the lender's responsibility for, and return of, all such property or financial restitution if lost or damaged. The School Board authorizes the superintendent to establish these controls.
