

**Safety Drills****School Board Approved: October 7, 2019**

The Principal(s) will schedule a minimum of ten emergency drills during the school year. The purpose of an emergency drill is to train students, to respond quickly under staff direction, to move safely, quickly, and quietly to a safe location. This may be within the building or an assigned evacuation area outside. The building principal is responsible for creating fire drill routes and procedures, and for maintaining all documentation relative to safety drills. The district will work with local emergency services on the planning and implementation of emergency drills.
